The purpose of this project is to reduce the occurrences of angle type injury crashes at the intersection of Route 6, Route 61 and Quassapaug Road. There are currently two proposed design alternatives: improvements to the existing stop-controlled intersection or construction of a modern roundabout.

There are potential right-of-way impacts associated with the proposed improvements which could include partial acquisitions as well as various easements and rights.

The proposed project is in the early stages of concept development. No funding has been identified and no schedule has been developed. The public informational meeting is being held to communicate existing conditions, discuss feasibility of proposed solutions, and receive public feedback for determining desired project outcomes.
